Motion number	3
Name of the person introducing the Motion to the GA	Flemming Meyer and Ruth Candussi
Member party	SSW and SP
Title [of the Motion]	EFA rejects the recognition and promotion of nuclear energy as a sustainable form of energy.
<p>The General Assembly of the European Free Alliance (EFA) resolutely rejects the European Commission's proposed recognition and promotion of nuclear energy as a sustainable form of energy within the framework of the EU taxonomy.</p> <p>Reasoning:</p> <p>The use of nuclear energy continues to be associated with unforeseeable risks and very high waste disposal costs. It is therefore logical to end this form of energy production as quickly as possible, as the EFA has always demanded. The EU Commission's proposed recognition and promotion of nuclear energy as a sustainable form of energy within the framework of the EU taxonomy leads to further investments and jeopardises the conversion of energy production to renewable forms of energy, which we urgently need to meet the climate challenge.</p>
